

Dear entegra Program Participant-

Purchasing safe and quality food products, as well as keeping those products safe during distribution, storage, production and service, are prime concerns for foodservice operators. Meeting these daily challenges requires you to be informed on current topics and issues.

Entegra provides Program Participants with an up-to-date portfolio of resources to support and aid you in your food safety efforts.

Entegra's Resources Include:

Food Safety Training Resources— Entegra has created a growing library of ready-to-use Food Safety training modules entitled "Back to Basics" and offers many training titles and resources through entegra's Resource Library, including the complete set of ServSafe training DVD's.

Food Safety Logs and Shelf Life Guidelines—Entegra provides templates for Food Safety Logs for you to download and customize to best meet your facility's needs and local regulations. Always reference the manufacturer expiration date or packaging date but use the **Shelf Life Guidelines** when dates are not available on a product.

Product Recall Notices and Archives—Entegra provides a courtesy notification of any recall or withdrawal action on entegra-contracted products. These notices are archived on entegraPS.com for one year.

Product Quality Assurance—Each entegra Preferred Manufacturer Partner must comply with entegra's Product Quality Assurance Supplier Requirements. There is also a Product Quality Reporting process for entegra Program Participants to report product concerns for follow-up by entegra's QA Team.

Links to Government and Food Safety Resources—Access these links via entegra's Product Quality Assurance and Safety Page.

Access these resources and more on the Quality Assurance and Safety Pages of entegraPS.com.
